The Stakes Are High	04

TAHOE TECH GROUP

# WELCOMES YOU TO DO IT THE RIGHT WAY

**Chances are your company is wasting time and money by not properly utilizing technology to reach your goals.**

**ERNIE DAMBACH**  
Founding Partner

Technology can be awfully frustrating. It's supposed to make your business stronger and your life easier. It should be empowering your employees and thrilling your clients. What if we told you that our proven process has led to exactly that, time and time again?

# LESS MONEY MORE TIME

You've spent plenty of money on technology in your business: networks, telephony, servers, computers, and software. Are you getting the results you expected? Is your team empowered and efficient at all times? Do you sleep well knowing your investment is protected from threats?

What if you had a cutting-edge team of IT experts working to help you reach your goals? We all know that technology is changing at an exponential rate. At Tahoe Tech Group, we dedicate ourselves to leveraging that change to strengthen businesses, enrich lives, and to protect our clients' investments.

# 5 BEST WAYS TO SAVE TIME & MONEY

1

## Eliminate productivity outages

- **Internet's down?** Setup two connections and a failover so you're always on!
- **Server's down?** Implement a business continuity appliance to restore productivity in minutes flat.
- **Global pandemic?** Configure cloud access to keep your team working from anywhere, anytime.

2

## Adopt the right software

- **Outdated business processes?** Stop emailing attachments back and forth all day. There's new software out there and it's faster and easier to use!
- **Productivity loss?** Note how much your employees make per hour. We can save them 30 - 60 minutes of lost time each day. Multiply that time, by their wage, for each employee. It numbers are staggering!

3

## Switch to a modern phone system

- **Still using a, "plain old telephone system"?** We save customers hundreds of dollars per month by moving them to modern phone systems.
- **"What happens if the Internet goes down?"** Your phone system keeps on working! Sync up your traditional desk phone, your Internet browser, and your cell phone. Take and make calls anywhere, any time.

4

## Buy the right hardware

- **Version numbers and acronyms?** They make all the difference in your final decision but are tough to decipher, especially if "tech" isn't your first language.
- **Am I spending the right amount?** Don't spend money on bells and whistles you don't need and don't go cheap and end up disappointed. Think long term and get it right the first time.

5

## Protect it all with cybersecurity

- **You've invested in all the right technology. Now what?** Your investment in technology is all for nothing if you leave your business susceptible to cyber-attack. One ransomware incident and every server, computer, and firewall you have bought is out the window. Make sure you're picking trusted cybersecurity tools and here's the thing - they're not that expensive!

# THE STAKES ARE HIGH

Companies continue to waste time and money because they don't know how to maximize the benefits of modern technology. Inflation continues. Payroll and taxes are on the rise. Your team is the lifeline of your business, but the technology they're using is the backbone. Continuing to flail around with insufficient tools, processes, and cybersecurity measures puts you on a rocky path at best, and at worst, puts you out of business.

We want to see you thrive.  
We want to empower your team.  
We want to thrill your clients.  
Don't you?

## Let's Talk

Spoiler alert: everything discussed so far are services that are offered by Tahoe Tech Group.

It takes 15 minutes to start. We want to get to know your business better. (You don't need to know the answer to anything technical!) We want to hear what your current struggles are, and we want to understand your goals. Once we're done with our call, we'll custom tailor a Technology Success Plan and in a couple of days, we'll present it to you. During our presentation we'll map out all the ways we can save you time and money by doing IT the right way.

From there, the sky's the limit.

[Click here to schedule your call and we'll talk to you then.](#)
